High Speed DSL...

Connecting to the Internet through a high-speed DSL (digital subscriber line) modem has never been easier or more cost-effective. If you currently use a 56K dial-up modem, then you know how painful and unproductive a slow connection can be. But you may not know the advantages of DSL.

DSL modems offer a "broadband" connection to the Internet, meaning that several PCs or Macintoshes can simultaneously connect to the Internet at speeds many times faster than a 56K dial-up modem.

Broadband also means no more dialing up, no more waiting for a connection, and no more hassles in remembering to hang up to avoid extra phone charges. With DSL, as soon as you launch your Internet browser (i.e., Netscape Navigator, Microsoft Internet Explorer), you are immediately connected to the Internet at blazing speed.

If you currently use a slow dial-up connection for Internet access and want to jump ahead with high-speed DSL, or if you are not yet connected to the Internet and think it is finally time to get "online," please call us at 818-706-9191, and ask for Chip.

(continued to the right)

(continued from the left)

Please note that DSL service is not yet offered in all areas, so first check with your telephone service provider about DSL availability.

FREE Seminar

Make sure to attend our next free seminar, Maximizing Insurance Billing Results. This seminar will help streamline and add effectiveness to your office's billing process. Seminar topics to be discussed include:
