Maximizing Insurance Billing Results FREE Seminar

A vital part to Insurance billing is verifying that Medicare, Proxymed, and/or individual payors received your claims and, more importantly, are actually processing all of your claims. Regardless of what caused the error in your electronic or paper billing, there are several steps that can be taken to verify that your claims are being processed.

Make sure to attend our next free seminar, *Maximizing Insurance Billing Results*, to be presented on October 28th and 29th, 2003. The seminar will help streamline and add effectiveness to your office's billing process. Seminar topics to be discussed include:

- * **Defaults & Treatment File Setup**
- * **Medicare Electronic Billing**
- * **Automatic Medicare EOB Posting**
- * **Third Party Electronic Billing**
- * **HCFA-1500 Paper Billing**
- * **Open Insurance Report**

For your convenience, Avanta will offer four free sessions at two separate locations over two days. The locations that have been selected for this seminar include our office in Agoura Hills and the Cedars Sinai Building in Los Angeles. Morning and afternoon sessions are available at our office on Tuesday October 28th and at the Cedars Building on Wednesday October 29th. For a map and directions to our office in Agoura Hills or to the Cedars Building in Los Angeles, please see our website or call our office for more information.

Please contact Jennifer at Avanta to RSVP. As space is limited, a 48-hour cancellation notice is required. If you are unable to attend our seminars, private training can be scheduled at your office for a training fee.

The DYMO LabelWriter

Forget those pesky, old methods of handwriting or using a clunky typewriter for your chart labels. Instead, meet the future with efficient, computer-printed labels from Avanta.

Avanta is pleased to offer the Dymo LabelWriter, the perfect solution for producing one-at-a-time chart labels. An existing software feature works with the Dymo LabelWriter to conveniently print professional, easy-to-read chart labels one-at-a-time. This feature also gives you the option to include the patient record number or birthdate along with the patient's name. The Dymo LabelWriter can also print multiple chart labels or other label formats if desired. The cost-effective Dymo LabelWriter, offered at \$395 (installation included), is space-saving too, with a small footprint of only 4" by 6".

For proper maintenance of your Dymo LabelWriter, make sure to use Dymo LabelWriter Cleaning Cards. Dymo recommends using a Cleaning Card once or twice a month, depending on your usage level, or if you experience diminished print quality. Cleaning Cards safely and effectively remove contamination from your Dymo's printhead. Keeping the printhead clean will improve print quality and extend the life of your Dymo LabelWriter.

To order additional Cleaning Cards, please visit Dymo's website at www.dymo.com or call them at 1-800-426-7827. If you would like more information about how to take advantage of the Dymo LabelWriter, please call Chip at Avanta at 818-706-9191.
